

# New ASAP-MCPAP Service

**Virtual  
Substance Use  
Counseling for  
Pediatric  
Primary Care  
Patients**

**ASAP-MCPAP services expand to offer telehealth counseling with an adolescent substance use counselor.**

ASAP-MCPAP currently provides phone consultations with the adolescent substance use and addiction medical team and will now feature the option for patients to have telehealth counseling with our substance use counselor, Maria Alden, LICSW. Similar to MCPAP telehealth face-to-face consults, the primary care provider will first complete an ASAP phone consult. The consultant will then determine if the patient is a good candidate for virtual substance use counseling. The ASAP-MCPAP staff will complete intake information and reach out to your patient to schedule the first appointment. To learn more about ASAP-MCPAP services and to meet the team click [here](#).

## **How to get started**

Call your assigned [MCPAP regional number](#) and ask to connect to the ASAP-MCPAP team.
